positive energy

Dear Sir/Madam,

Electricity Pricing in Queensland: Issues Paper October 2015

Energex Limited (Energex) welcomes the opportunity to comment on the Queensland Productivity Commission (QPC) discussion paper on Electricity Pricing in Queensland.

Energex understands that the primary objective of the Electricity Pricing Inquiry is to examine electricity pricing in Queensland and provide the Government with future options that improve outcomes for consumers.

In order to meet the challenges facing the electricity industry collaboration between Government, network businesses, retailers, customers, and the community is critical. Energex's submission has been guided by the following key themes; ensuring efficient costs for customers, providing choice and control for customers, promotion of economic development for Queensland by acting in the long term interests of customers, and the facilitation and integration of low carbon energy options (including renewable energy).

Should you have any queries regarding this submission, please do not hesitate to contact Mr Neil Andersen, Group Manager Regulation & Pricing, on (07) 3664 4009.

Yours sincerely

Kevin Kehl
Executive General Manager
Strategy, Regulation and Governance
