

Please leave T37 and T20 as it is as we have structured our business for the past 50 years around these tariffs and keep on making changes in all aspects of our business year in year out to become more productive and efficient so as to try and make a dollar and all that seems to happen is we make it in one hand and the Government takes it out of the other hand by way of taxes, charges and now electricity costs. I am over it. It is damn depressing. We need to leave it as it was 7 years ago.
