To the Productivity Commission,

I am writing to you regarding the increases in electricity charges.

The charge of an annual impost of \$478.88 supply charge is excessive and unfair to low income households, especially fixed income – single pensioners an example.

Also...the inclusion of 'headroom'. C.A.R.C. should not be allowed, particularly C.A.R.C...not allowed in other jurisdictions plus Origin have stated they are dropping this door to door tactics anyway.

I would suggest you have a good look at the 'bundled' items in the supply charge....some of which should not be there.

Charging for reading meters. How long has this been allowed?

Yours sincerely,
Edward Dignam,
